

Topdress Formula – White Shrimp

Immune Enzyme IE100F

IE100F provides effective immune response and improves digestion.

IE100F blend is a unique immune enhancing formula specially-designed for White Shrimp/P vannamei, and taking into account this species' omnivorous feeding habits and normal exposure to highly-dense culture environments. The natural ingredients found in IE100F have been selected to strengthen the animals' survival response against pathogens and pollution. IE100F contains no steroids or growth hormone additives.

This specialized formula is made from food-grade ingredients that are non-hazardous and non-toxic, many of which are generally regarded as safe (GRAS). Active ingredients consist of proteins and enzymes with known capabilities to enhance immune response in white shrimp and increases in the digestion of proteins, lipids, phosphorous and

carbohydrates for increased absorption and the break down of organic wastes.

IE100F benefits:

- Improve bioavailability of ingredients in standard formulated feed
- Enhances non-specific immune response from pathogens and pollution factors
- Removes systemic toxins and waste matter from inside the animal
- Increase digestion capacity of white shrimp to absorb more nutrients from natural and artificial feed sources
- Provides dramatically higher survival ratios
- All-natural and environmentally safe

The Complete Aquaculture Program

IE100F

Application

Beginning the third month of culture (ie. 60 days DOC) and continuing on until harvest of the grow-out stage, add 1 – 2 ml/kg of white shrimp feed.

During times of apparent stress or disease, increase the dosage to 5 ml/kg of white shrimp feed.

Prior to application mix IE100F 1:50 with water. Topically spray the dilution onto feed. Once sufficiently dried (about 20 minutes of air-drying), feed the white shrimp as you would normally.

For optimal FCR utilize the **e_z** Aquaculture feed schedule.

Composition

Water, enzymes from plants, enzyme enhancing agents, protein nucleotides, phosphatidyl choline, trace minerals and stabilizers.

Packaging

20 L
Tight-head Pail

60 L
Poly Drum

200 L
Poly Drum

Handling and Storage

Apply only as intended. Though this product is non-toxic and nonhazardous, it is not suitable for human consumption. The manufacturer assumes no liability, expressed or implied, in the use of this product.

Store this product out of direct sunlight in a cool (under 40° C) dry area. For best results, use within 12 months. Request a IE100F MSDS for more specific information.
