

## Soil Enrichment SE100S

Soil enrichment is an integral first step in a healthy pond environment.

SE100S is the logical choice as a management tool in maintaining sustainable production in a semi-intensive or high density aquaculture farm. SE100S is designed to increase enzymatic action at the substrate level thereby reducing pollution. The increased enzymatic action also improves the biological activity in the soil which in turn accelerates the replication of beneficial bacterial colonies.

SE100S formula promotes healthy algal growth, helps digest fats, proteins and carbohydrates from shrimp waste or uneaten feed and is a valuable tool in disease prevention.

SE100S benefits:

- Restores and maintains soil fertility by increasing enzymatic activity at the substrate level
- Binds and digests toxic wastes and heavy metals
- Reduces sludge build-up at the pond bottom
- Eliminates chemical fertilizer and pesticide dependence
- Reduces downward nutrient leaching through the soil substrate
- Increases and sustains pond yields over many cycles
- Environmentally safe and all-natural

*The Complete Aquaculture Program*

# SE100S

## Application

*Soil Preparation:* While beneficial effects have been achieved with a dosage of SE100S as low as 120 kgs per hectare, we recommend an application rate of this formula of 320 kgs per hectare. Ensure proper coverage of pond bottom.

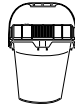

*Important:* Do not use this product together with chemical fertilizers. If to be used with chemicals, always have a 10-day spread (minimum) between adding fertilizer or chemicals and SE100S.

For optimal FCR utilize the **e<sub>z</sub>** Aquaculture feed schedule.

## Composition

Ingredients contain dry premium natural trace minerals, enzymes from plants, enzyme enhancing agents and stabilizers.

## Packaging

18kg Pail  
Screw-head Pail

22.73kg Bag  
Bag in a Box

1 MT  
44 Bags / Skid

## Handling and Storage

Apply only as instructed. Though this product is non-toxic and non-hazardous, it is not suitable for human consumption. The manufacturer assumes no liability, expressed or implied, in the use of this product.

Store this product out of direct sunlight in a cool (under 38° C) dry area. For best results, use within 12 months. Request an SE100S MSDS for more specific information.
