

Our powerful grease dissolver

e_z Clean Degreaser lifts and eliminates grease from any hard surface

e_z Clean Degreaser cuts through layers of stubborn grease and oil and dissolves it so that grime can not be redeposited while cleaning.

e_z Clean Degreaser's concentrated enzyme and surfactant combination works by breaking down the grease and oil into smaller constituents. Then the broad based enzyme solution cuts the exposed fat and oil so that it can not reform on surfaces or in a waste stream.

e_z Clean Degreaser is used anywhere from commercial kitchens to industrial production facilities to parts degreasing applications.

- Does not allow grease to reform
- Leaves no chemical residue
- Removes grease build-up
- Biodegradable formula
- Safe for employees to use
- Contains no phosphates, abrasives, solvents or harsh chemicals
- Used in wide variety of industries
