

Topdress Formula – Poultry

Digestive Enzyme DE120F

DE120F is a specialized topdress digestive enzyme product for efficient poultry meat production.

Great Lakes Bio Systems' DE120F Topdress Formula for Poultry is a blend of ultra concentrated proteins and enzymes designed for the enrichment of standardized feed formula for layers and broilers.

DE120F is especially relevant when feeds are formulated using standard or substituted feed ingredients. The enzymes in this formula increase the digestive capability, thereby optimizing the absorption and the benefit from dietary nutrients in the feed. DE120F enables poultry to quickly overcome systemic toxins and waste matter, which automatically increases the capability for growth and production.

Broilers and layers fed with a diet enriched with the DE120F Topdress will exhibit greater capacity to fend off stress and disease, yielding improved survival ratios or longer and more productive cycles.

The DE120F is natural and biologically safe, consisting of proteins and enzymes with known capabilities of breaking down toxins such as ammonia and sulfides as well as metabolizing proteins, lipids, phosphorous and carbohydrates for increased absorption.

DE120F benefits:

- Improve digestion to boost dietary nutrient uptake from feed; enhance growth; improve survival rates
- Promote biological conditions that minimize stress levels and increase resistance to disease
- Eliminate systemic toxicity to increase meat or egg quality and quantity
- Increase digestion capacity to absorb more nutrients from the feed
- Ultra concentrated, more economical

DE120F

Application

Feed Milling: Mix at the rate of 1-2 L per MT of feed. For best results, mix DE120F 1:10 - 1:20 with water or other liquid ingredients. Apply by fogging at post-pelleting or cooling stage.

Grow-out Site: Mix at the rate of 1-2ml per kilo of feed. Prior to application mix DE120F 1:50 with water. Topically spray the dilution onto feed. Once sufficiently dried, feed the poultry as you would normally.

For optimal FCR contact your GLB rep.

Composition

This is a proprietary formula. Ingredients contain water, enzymes from plants, enzyme enhancing agents, trace minerals and stabilizers.

Partial list of active enzymes: Amylase, Catalase, Cellulase, Esterase, Hemicellulase, Hydrolase, Isomerase, Ligase, Lipase, Lyase, Oxidoreductase, Protease, Transferase among others.

Packaging

20 L
Tight-head Pail

60 L
Poly Drum

200 L
Poly Drum

Handling and Storage

Apply only as intended. This product is not food grade nor for human consumption. The manufacturers assume no liability, expressed or implied, in the use of this product.

Keep container cool; under 38°C, tightly closed and away from sunlight. This exclusive product is available in 20L pails and 60L or 200L drums.

Request a DE120F MSDS for more specific information.
